

# Present: Review of current public supported R&D activities (H2020, ERA-NET, EERA-JPGE, etc.)

Philippe Dumas

# EU support to geothermal in FPs

# H2020 projects

ThermoDrill - Fast track innovative drilling system for deep geothermal challenges in Europe;

DESCRAMBLE - Drilling in supercritical geothermal condition;

InnoDrill - Technology platform for research-based innovations in deep geothermal drilling;

CHPM2030 - Combined Heat, Power and Metal extraction from ultra-deep ore bodies;

GeoWell - Innovative materials and designs for long-life high-temperature geothermal wells;

SURE - Novel Productivity Enhancement Concept for a Sustainable Utilization of a Geothermal Resource;

DESTRESS - Demonstration of soft stimulation treatments of geothermal reservoirs;

# H2020 +

- Geothermal ERA NET
- Marie-Curie initiatives
- Cooperation with Mexico
